

## Chemist/Radiochemist (m/f)

### **The Company:**

Ion Beam Applications (IBA): opening new ways in the fight against cancer.

IBA develops, manufactures and supports medical devices and software solutions for cancer treatment by proton beam therapy, for cancer diagnosis and for patient quality assurance (Dosimetry). In addition, the company partners with healthcare leaders to provide cancer clinics and academic health centers with a fully-integrated approach of the patient flow.

### **Location**

Fleurus, Belgium

### **Responsibilities**

You will be part of the Radiochemistry Team and the RadioPharma Solutions department, which offer services and support packages ranging from Research & Development (R&D) and Customer Service to turnkey radiopharmacies design and installation (Integralab).

- Develop new products and services through contribution to R&D projects;
- Automate and validate new radiopharmaceutical productions;
- Perform all quality tests: HPLC, GC, MS, TLC, etc.;
- Review procedures and processes, propose modifications, improvements and updates, and implement necessary changes;
- Maintain accurate records and write SOPs and reports;
- Install, qualify and maintain new equipment on customer sites;
- Train customers on equipment use and provide information on available upgrades;
- Report and document interventions and actions undertaken with the required level of details and accuracy;
- Provide technical support to sales and marketing teams;
- Participate in international congresses in the field of expertise and visit customers with sales representatives.

## **Profile**

- Bachelor/ Master degree/Ph.D. in Chemistry;
- Experience in Radiochemistry is an advantage;
- Willingness to broaden your knowledge and follow appropriate and regular trainings;
- A driven, proactive and hands-on individual;
- Ability to organize your work autonomously and to take initiatives;
- A team player with very good communication skills;
- Good client facing skills;
- Given the international context, good oral and written skills in English;
- Willingness to travel 20 to 30% of your time.

## **We offer:**

IBA offers you the opportunity to realize great achievements in the fight against cancer. Our employees are perceived as passionate, pragmatic and result oriented people dedicated to develop leading edge technologies to protect, enhance and save lives!

If you are stimulated by multicultural challenges and willing to travel, we offer you the opportunity to join a team of more than 35 nationalities working on more than 40 different sites on 3 continents.

IBA offers you a competitive performance based compensation package and a flexible work environment. You have real possibilities to evolve within IBA's worldwide, leading organization and to create your own career path, supported by training programs to acquire new skills and ensure they stay sharp.

As an Equal Opportunity Employer IBA is committed to a diverse workforce.
