

The “Journée Franco-Belge de Pharmacochimie” is a recognized annual meeting on Medicinal Chemistry. This 30th edition will be held on the 25th to the 27th of May in the beautiful city of Amboise located in the “Centre – Val de Loire” Region of France.

This symposium aims to promote the meeting between medicinal chemists mainly from France and Belgium. The JFB are renowned for advanced science, conviviality, and outstanding opportunities for senior and young scientists to exchange knowledge.

The scientific program will include one “Grand Public” conference, one opening conference and 7 plenary lectures by internationally recognized scientists.

Industrial and academic scientists will give talks mainly in imaging (TEP), oncology and CNS disorders topics.

An important part of the program is devoted to open lectures (11 oral communications) giving the opportunity for young scientists to present their research.

The official language for the oral communications will be English.

The deadline for the registration is April 15, 2016 - The dead line for abstracts submission is May 1, 2016.
